DETAILED ACTION

1. This communication is in response to Applicant's Amendment to Office Actions dated October 7, 2009, filed December 23, 2009, and telephone interview conducted January 29, 2010.
- 1-1. Claims 11 and 12 have been amended. Claims 1, 5-8, 11, and 12 are pending.
- 1-2. Claims 1, 5-8, 11, and 12 have been examined and allowed.

EXAMINER'S AMENDMENT

2. An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to Applicants, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
3. Authorization for this Examiner's amendment was given in a telephone interview with Mr. Ali M. Imam (Reg. No.: 58,755) on January 29, 2010.
4. The claim has been amended as follows:
 - 4-1. In claim 1, delete the extra redundant “;” at the end of line 10.

Reasons for Allowance

5. The following is an Examiner's statement of reasons for allowance:
 - 5-1. The closest prior art of record discloses:
 - (1) A system is operable to store the processor tasks in a shared memory and permit the sub-processing units to determine which of the processor tasks should be executed based on priorities of the processor tasks (Inoue et al., U.S. Patent Application Publication No. 2005/0188373 A1); and

(2) A stochastic priority based scheduler for selecting executable tasks in a computer system (Welland et al., U.S. Patent 5,247,677).

5-2. Claims 1, 5-8, 11, and 12 are allowed in view of the claim amendments and Applicant's arguments in pages 8-10 of the Amendment filed on December 23, 2009.

Although priority based scheduling and processing are known and obvious as shown in the prior art, independent claim 1 has identified the distinct combination of features including "processing for the data indicated by the output of the important component selection unit, updating data stored in the data storage unit whose values are changed by the processing, computing the importance value of the each updated data" and "if the same identifier already exists in the priority list, the important component selection unit, comparing two importance values having the same identifier, excludes the lower one from the priority list" as shown in figure 2, which has not been uncovered in a single teaching, nor would a modification of prior art references be obvious to one of ordinary skill in the art to yield these limitations in the context of the claim.

Independent claim 11 has identified the distinct combination of features including "performing a processing for one of data that has a highest priority in the priority list and is indicated by the corresponding identifier, wherein a statistic of the candidate values that refer mean and median for each data is used as a representative value of the data", "updating at least one of data whose value is changed into a new value by the processing, wherein the new value replaces one of the corresponding candidate values that is farthest from the new value", and "computing the importance value of each updated data as a function of the corresponding candidate values that refer magnitude of variation" as shown in figures 2 and 18, which has not

been uncovered in a single teaching, nor would a modification of prior art references be obvious to one of ordinary skill in the art to yield these limitations in the context of the claim.

Independent claim 12 has identified the distinct combination of features including “processing for one of data that has a highest priority in the priority list and is indicated by the corresponding identifier, wherein a statistic of the candidate values for each data is used as a representative value of the data”, “updating at least one of data whose value is changed into a new value by the processing, wherein the new value replaces one of the corresponding candidate values that is farthest from the new value”, and “computing the importance value of each updated data as a function of the corresponding candidate values that refer magnitude of variation” as shown in figures 2 and 18, which has not been uncovered in a single teaching, nor would a modification of prior art references be obvious to one of ordinary skill in the art to yield these limitations in the context of the claim.

Moreover, as stated in MPEP § 2131.02, “The identical invention must be shown in as complete detail as is contained in the ... claim.” *Richardson v. Suzuki Motor Co.*, 868 F.2d 1226, 1236, 9 USPQ2d 1913, 1920 (Fed. Cir. 1989). The elements must be arranged as required by the claim, but this is not an *ipse dixit* test, i.e., identity of terminology is not required. In *re Bond*, 910 F.2d 831, 15 USPQ2d 1566 (Fed. Cir. 1990). Therefore, independent claims 1, 11, and 12 have been allowed over the prior art of record. Dependent claims are allowed as they depend upon allowable independent claim.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
